

Job Description: Software Developer

Reports to: SVP Software Development

Location: Hybrid / In-office, Troy, NY

LevrX Technology Inc., is an exciting customer driven and results focused healthcare software applications company that is providing the healthcare industry with levers to optimize pharmacy outcomes. Our mission to develop powerful, relevant, and unique solutions is fueled by our commitment to our customers to improve the patient experience and reduce the cost of care.

What we offer:

- Work with a brilliant and creative team on a variety of products and technologies
- Growth company mentality with room for role expansion and professional growth
- Help people save money on life-saving prescription medicines
- Competitive salary
- Health, vision & dental insurance
- Paid time off
- Life insurance policy
- 401k with employer match

Who we're seeking:

LevrX is seeking a talented and experienced software/applications developer (SD) to assist in all aspects of product development, deployment, and life cycle management. The SD will coordinate with LevrX leadership, internal and 3rd party development and infrastructure teams, partners, and vendors to build and maintain software applications. In addition, the SD will assist in all aspects of the Software Development Life Cycle (design, development, testing, and deployment), and the creation and enhancement of processes and methodologies used to facilitate the SDLC.

The responsibilities of the SD include but are not limited to:

1. Develop desktop and mobile applications based on functional specifications
2. Software conceptualization, technical specification, object design
3. Design and implement technical architectures and infrastructure for the LevrX product suites
4. Select dependencies, define standards and tooling for the development team
5. Work with LevrX leadership and development teams (both internal and external) to define releases, sprints, and to manage timelines, resource allocation, and roadmaps
6. Troubleshoot, debug, perform integration and testing, and enforce code hygiene and secure and scalable practices

7. Release management, planning, and enhancing all aspects of the SDLC
8. Assist, teach, and mentor team members to improve their skills and broaden their capabilities
9. Related duties, as required

List of essential capabilities:

1. Ability to solve complex logical and technical problems
2. Experience with Java service development, familiarity with LevrX stack (MySQL, Hibernate, Spring, Maven, React, Typescript)
3. Experience with troubleshooting, debugging, and optimizing complex codebases
4. Able to work collaboratively with leadership to define and configure DevOps environments and methodologies
5. Interest in developing superior supervisory/management skills, including team building and mentoring

Minimum Requirements:

1. Bachelor's Degree or equivalent experience in computer science, or related fields of study
2. 3+ years of relevant experience and knowledge of several programming languages and practices
3. Supervisory / team leadership experience preferred
4. Ability to maintain strict confidentiality at all times
5. Exposure to healthcare business cases and applications a plus

Salary Range: \$80,000 - \$110,000, depending on level of experience and skillset
